

## What is Healthy Communities?

Healthy Communities combines aspects of the Early Periodic Screening Diagnostic and Treatment (EPSDT) Outreach and Administrative Case Management program and Child Health Plan *Plus* (CHP+) outreach into one model to better meet the needs of clients. Family Health Coordinators are available statewide to serve clients through Healthy Communities.

### What Healthy Communities services are available to Colorado Medicaid and CHP+ clients?

This outreach and case management model takes into account that many of our families do not always understand the distinction between Medicaid and CHP+. In fact, many families have one child that is enrolled in Medicaid while another is enrolled in CHP+.

Healthy Communities focuses on the "life cycle of a client" which may involve all of the activities necessary for the client to obtain coverage and access to coordinated health care services in appropriate settings called a Medical Home. Family Health Coordinators perform the following activities:

Generate awareness of the existence of the Medicaid and CHP+ programs;

- Offer information about how to apply for Medicaid and CHP+ and the availability of face-to-face application assistance;
- Inform families about where to submit applications for processing and eligibility determination;
- Educate families on the value of preventive health care services and how to access benefits at the appropriate settings;
- Link clients to Medicaid and CHP+ providers who will serve as the client's Medical Home;
- Provide clients with information and referrals to other community programs and resources; and
- Explain the re-enrollment process to families who continue to be eligible for Medicaid and CHP+ to eliminate gaps in coverage.

### Who is eligible for Healthy Communities?

All Colorado citizens who would like to access public programs or those who are already eligible for public programs and are under the age of 21 or pregnant.

### How can a client get services?

To find a Family Health Coordinator in your area, see the table on pages 2 and 3.
